

Procurement

Expectations have never been higher for savings, compliance, risk management and process efficiency. Companies are looking to procurement for value creation and strategic initiatives. Our solutions will drive your results—and influence—all the way to the c-suite.

Drive adoption, control spend and capture savings across users, devices and locations.

Determine's Cloud Platform-based Procurement Solution helps businesses gain visibility into all spend, empowers easier, faster and on-contract purchasing decisions and simplifies the entire requisition to PO to payment processing stream.

An intuitive user interface provides a Amazon-like online experience, with self-service and collaborative features that make day-to-day search and purchase easy.

That drives uptake and adoption – not to mention compliance – across employees and suppliers. Wherever the location, whatever the device, whoever the user.

Going from catalog to payment is a chain reaction – a group of processes running in series and/or parallel for both the goods or service, and the order/payment processing. Determine's procurement solution simplifies it all by automating every step and capturing the data generated for analysis later. Seamlessly.

Determine scored No. 1 for "Out-of-the-Box" Procure-to-Pay Functionality in the 2017 Gartner Magic Quadrant.

Gartner P2P Magic Quadrant, June 13, 2016

Key Benefits

- Advanced integrated analytics provide savings identification for realization activities
- Analyst recognized rule-based purchase-order-(PO)-to-invoice match, supplier information management and PO match to contract for rapid source-to-settle
- Intuitive user experience encourages fast adoption for better compliance by requesters
- Integrated procurement contract ecosystem for monitoring performance, compliance, and risk
- Streamlined governance in the purchase-to-order, and order-to-invoice process

End-to-end modular configurability empowers users across your enterprise with deeper, more advanced capabilities, out-of-the-box or built to your needs.

Purchase Requisition: Time is money – save both.

Make it easy for requisitioners to get what they need. Automate the requisitioning process through predefined templates, packages and workflows to quickly process purchase requests from business users.

- Shopping Cart • Off-Catalog Management • Requisition Management

Catalog Management: Go from catalog to cart faster.

Google-like internal/external catalog search and easy-as-Amazon shopping with *easyCART* keeps everyone on-contract.

- Multi-Catalog Versioning • Tiered Pricing • Amazon Integration
- Item Attribute Management • Classification Mapping

Request for Quote (RFQ): Use competition to drive down costs.

Turn one requisition into multiple quotes from many suppliers quickly and easily – compare and save.

- Requisition to Quote • Award Process • Quotation Collaboration • Quote to PO

Purchase Order Automation: Replace errors with efficiencies.

An automated requisition to PO to supplier submission workflow that's audited, validated and error free.

- Automatic Requisition to PO Creation • Purchase Order Creation Assistance
- Blanket PO Processing • PO Modification Management • Purchasing Dashboard

Procurement Contract Compliance: Control spend and maverick buyers.

An embedded process simplifies managing against catalogs, tracking usage and controlling maverick spend.

- Blanket Contracts • Contract Expiry • Recurring Contract Management

Time Tracking Management: Improve time management efforts

Manage time tracking for internal & external invoicing for contingent labor needs.

- Time-Sheet Submission & Approval • Services PO Matching with internal/external activity reports • Internal/external re-invoicing

Receipt & Dispute Management: Maximum compliance, minimum disruption. Enhanced PO matching with authorized users means better flow, reduced costs, fewer disputes.

- Rules-Based Auto & Manual Receipts • Partial/Over Receipt Management
- Multi-Step Receiving with Approval • Receiving Rating with Return Management
- Payment Validation • Three-Way Matching • Automated service receiving

We have partnered with Determine to create an end-to-end purchasing solution

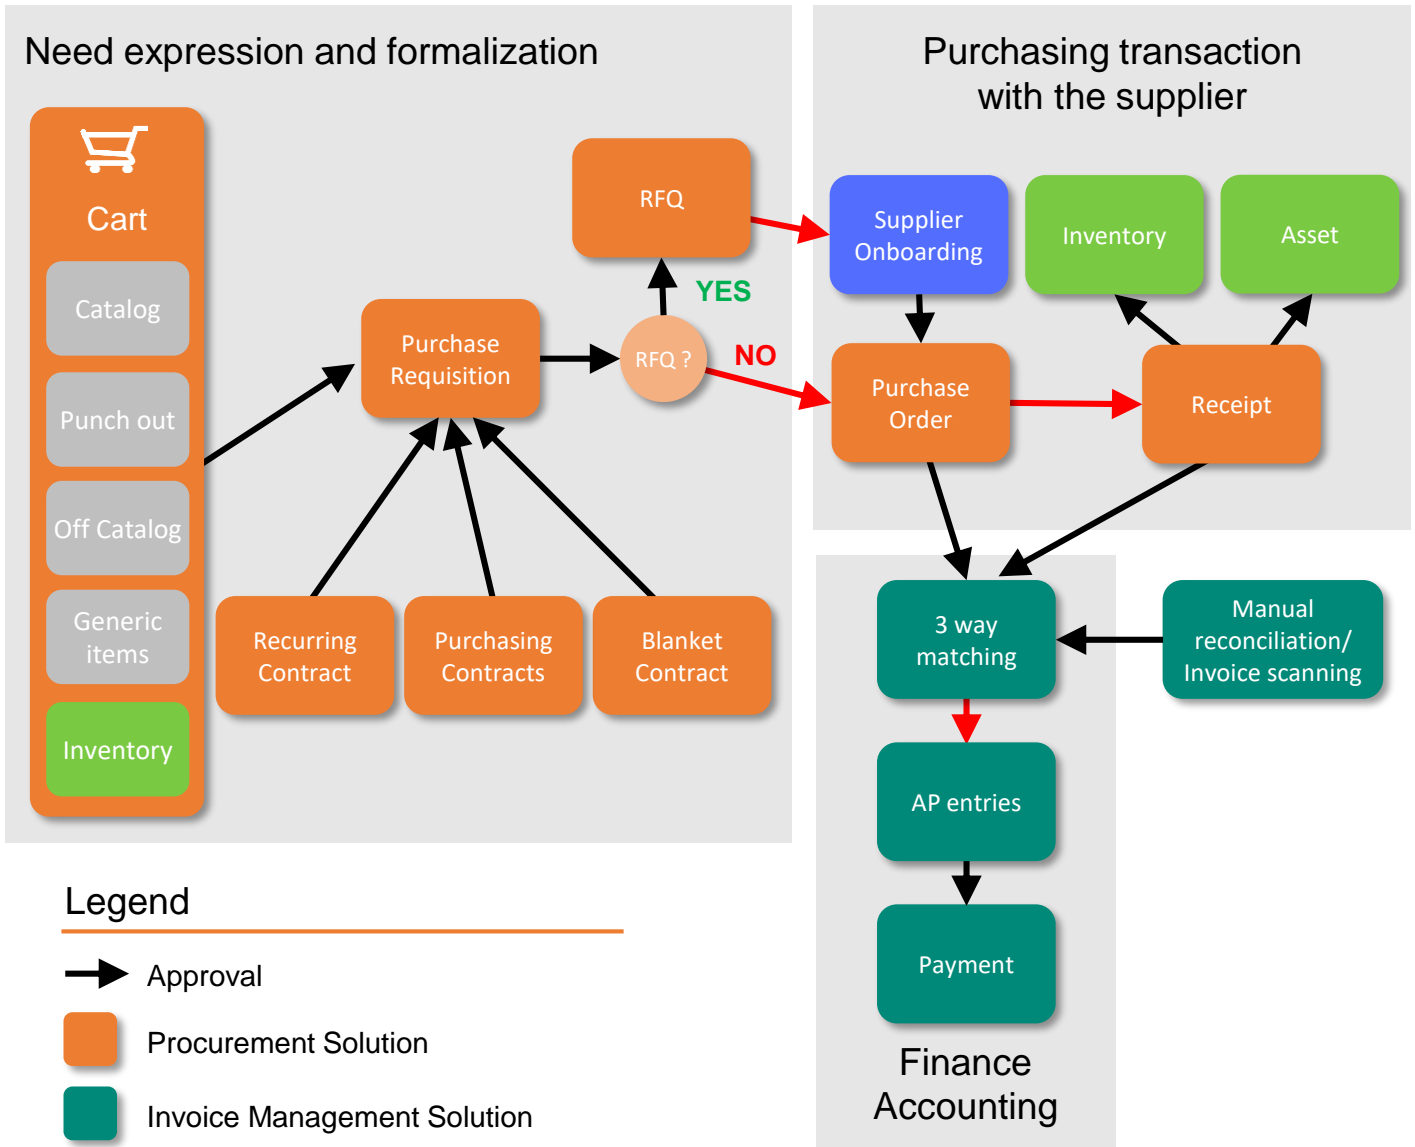

that provides better visibility of our variable project costs in a dynamic marketing environment.

Our solution has become our strategic application that we continue to deploy globally.
